*I'm a Web Developer and a Designer*

---

Dear Sir/Madam,

## APPLICATION FOR UX/UI FRONTEND DEVELOPER

I am UX/UI frontend developer, and I have 7.5 years working experience in the digital agency industry. I always like to try something new and explore new technology. My passion is to design a nice user experienced website and bring good feeling to the user. I will be an excellent addition to your organization.

I graduated from The One Academy with Multimedia design diploma. I started my multimedia designer career in Agenda Solution Malaysia, which is a leading internet technology and interactive marketing services company in Asia. Being a junior role, I did design and coding on e-newsletter, digital banners, website retainer and digital campaign. I gain a lot of working experience at Agenda. From a junior designer become a senior designer, I am getting more and more understanding about the digital advertising industry and my skill is getting more and more solid too. In Agenda, I am doing design and frontend development at the same time. They trained me to become a creative frontender and now I more understand and clear about a website workflow, from design stage till the development stage. After that, I found my passion on frontend development gradually and I started to learn about what is user-experience. Being a frontend, I feel I gain more of the sense of accomplishment, compared with design. Many opportunities have been given by the agency too, I handled multiple brands such as Toyota, Mead Johnson, Colgate, Lexus, Revive, Maybank, Nikon and Alamanda Suria KLCC.

After 4.5 years of working experience, I joined Kingdom Digital 1 year as frontend developer role. In a smaller digital agency, I learn to work independently. I am getting more involved to every single projects and build a website from scratch till deploy to live. I picked up wordpress on my own and developed many wordpress site for the agency, such as their agency website, ABCM Malaysia and WFAKL. Besides that, I did develop parallax features campaign for Nescafe and Toyota too.

I joined APD Malaysia in May 2016, as a web developer. I involved a lot of integration works, such as more co-operation with backend programmer and make sure frontend code is integrating nicely with the backend data. My javascript skill improved a lot in this few years, I picked up jquery, ajax and some js frameworks. By the way, I also use some toolkit like gulp and grunt to make my development run efficiently. To help me to manage every projects efficiently, I use Git as my version control system, it truly helps a lot when working in a big team. I also have the chance of being a frontend lead in a bank revamp project, I started to learn how to manage resources, timeline planning and make sure every task can be completed on time.

There is more details about my experience in my following resume and you be able to view some of my portfolio in my website, [www.chuantheng.com](http://www.chuantheng.com). I can be reached anytime via my phone, 012-920 2471 or via email at [tctheng02175@hotmail.com](mailto:tctheng02175@hotmail.com).

Thank you for your time and I look forward to further discuss about this employment opportunity. Hope to hear from you soon and have a nice day.

Best Regards,  
Tan Chuan Theng
